

**Class 9 'M'**  
**Presents:**

# **Stock Market Presentation**

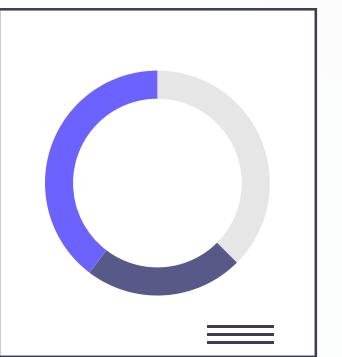

---

19 April 2025

**SR GLOBAL SCHOOL**

# 1. What is Stock Market

The stock market is a place where people buy and sell shares of companies. It helps businesses raise money and gives people a chance to invest and earn profits.

Made By - Ansh Chaurasia

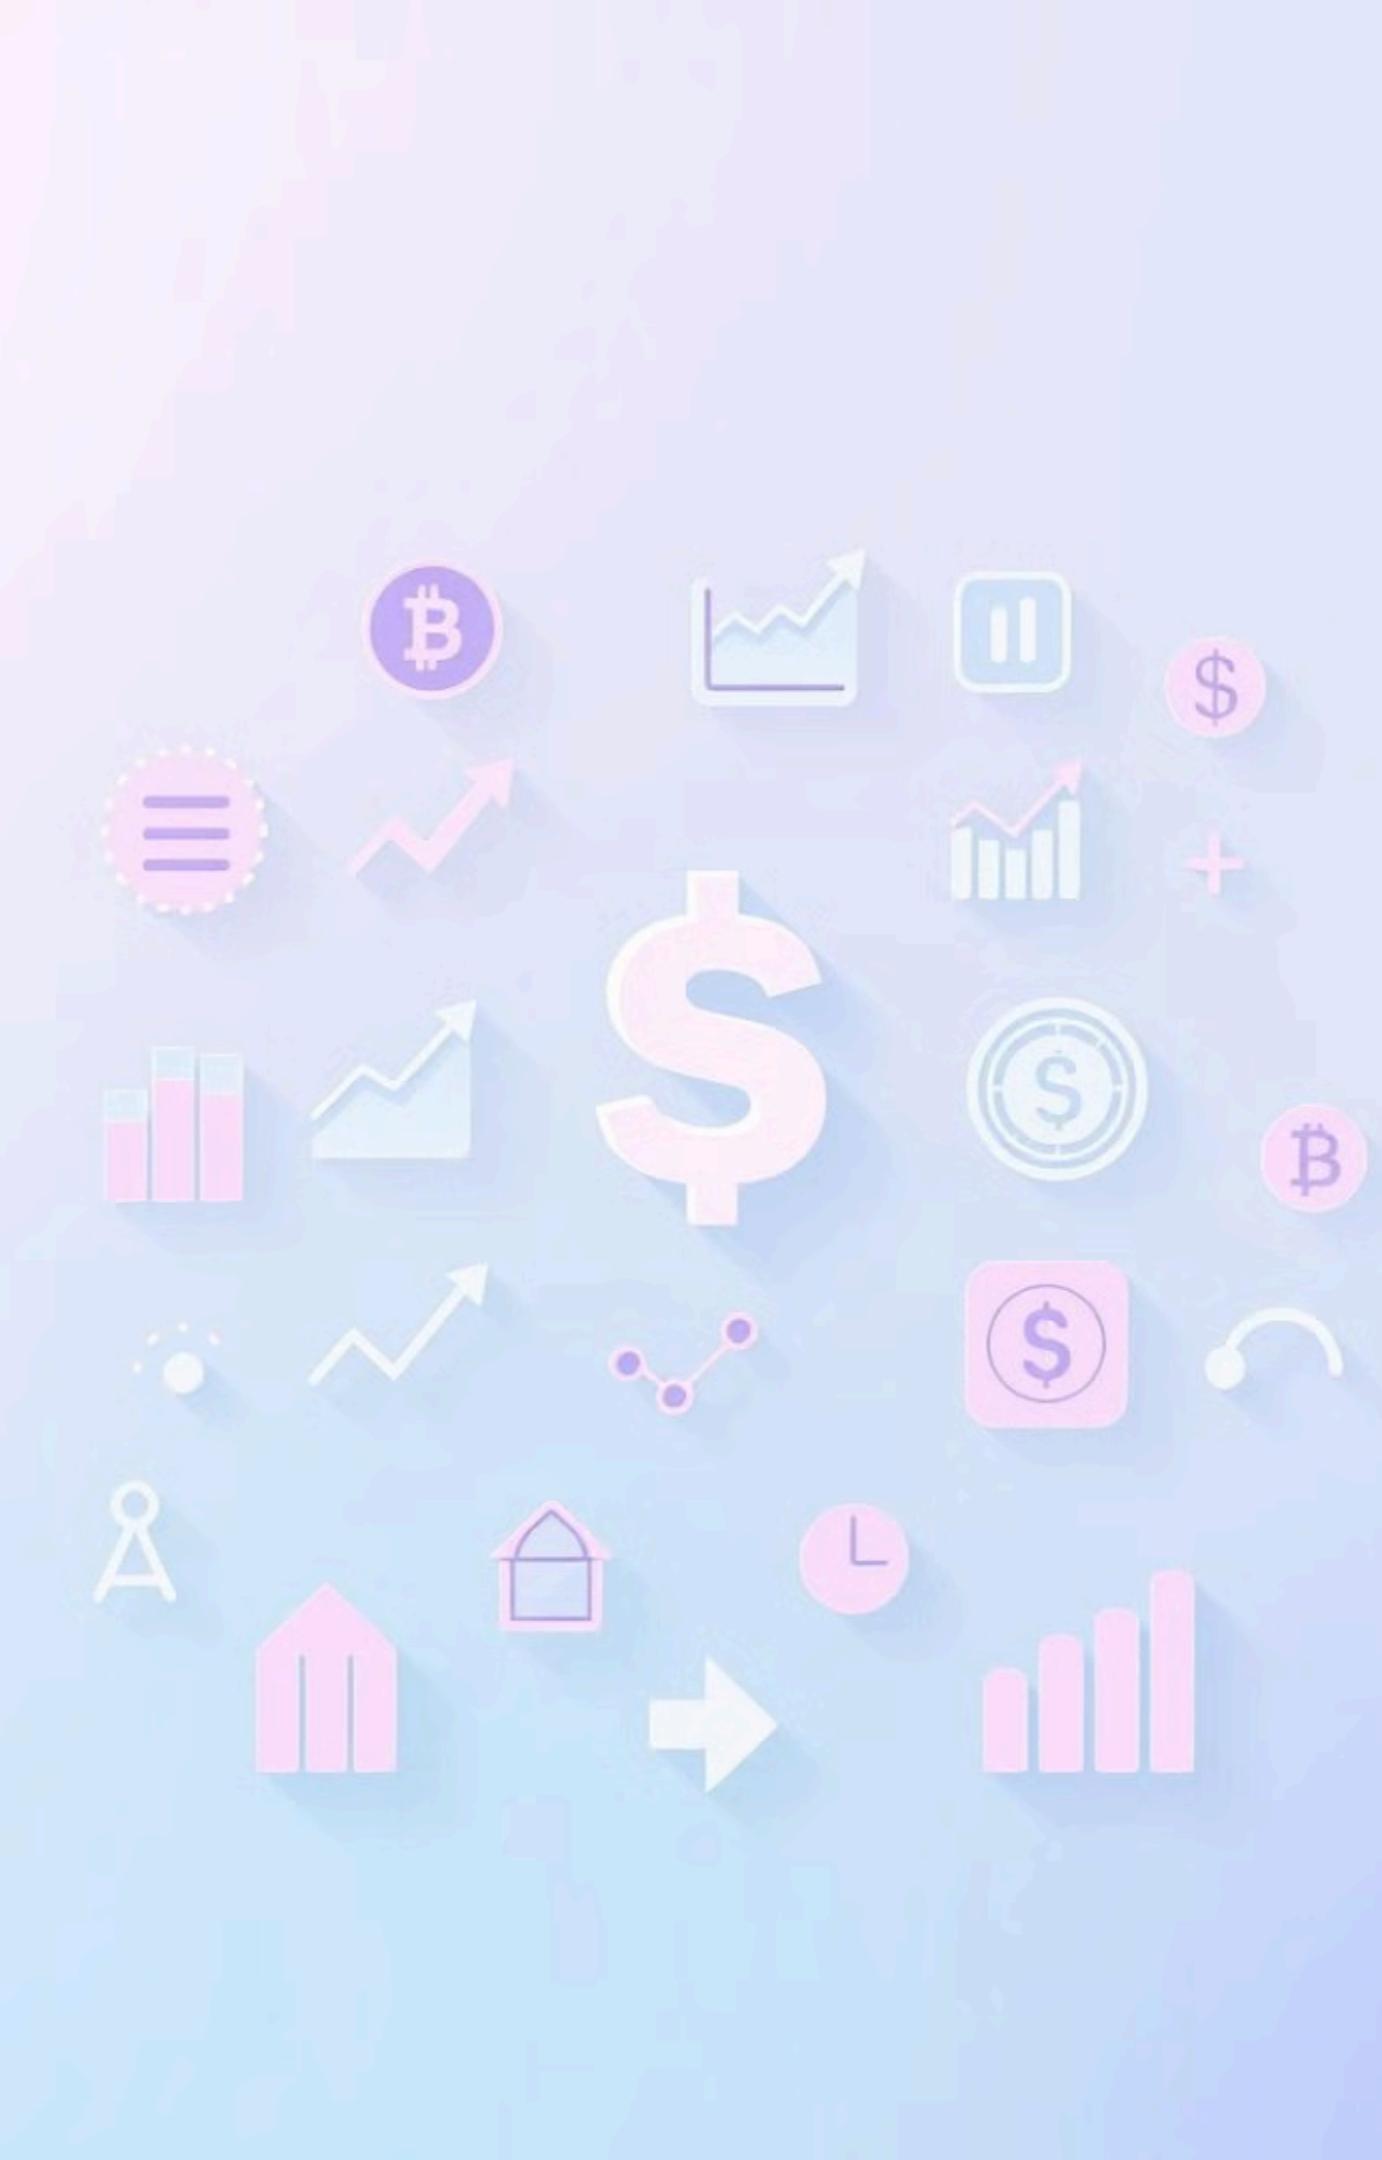

## 2. How Do Stocks Work?

Stocks are small ownership parts of a company. If the company does well, the stock price increases and you can earn profit.

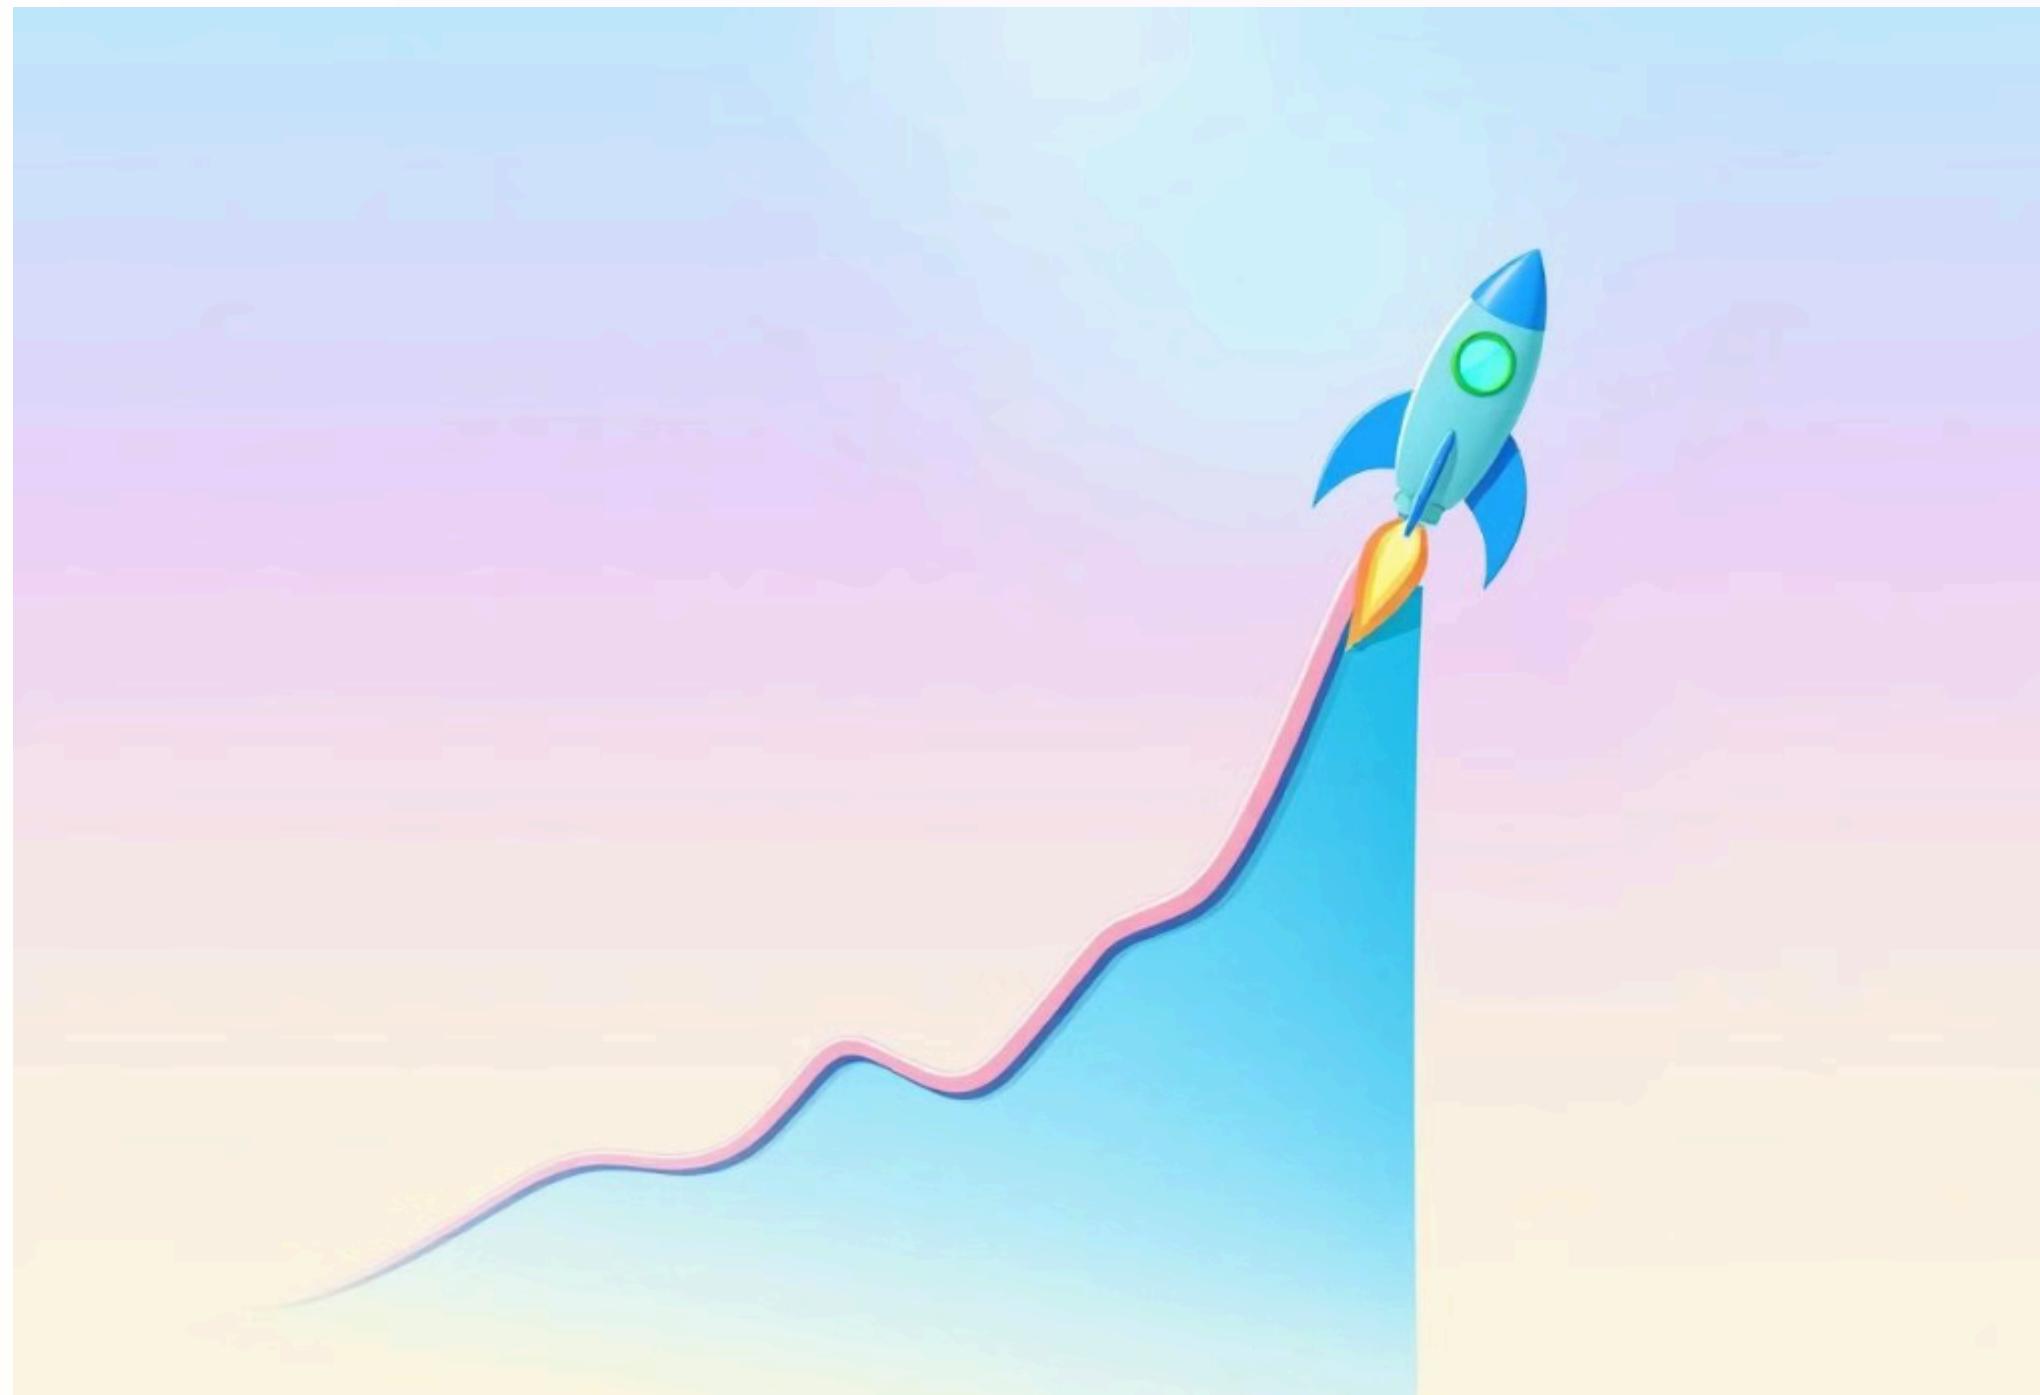

## 3. Types of Stocks

- 1. Growth Stocks** – From fast-growing companies; prices may rise quickly but usually no dividends.
- 2. Dividend Stocks** – Pay regular income to shareholders from company profits.
- 3. Value Stocks** – Priced lower than their actual worth, with potential for long-term growth.

## 4. Why Do Companies Sell Shares?

Companies sell shares to get money from the public. This money helps them grow, start new projects, or pay off loans. This process is called an **IPO** (Initial Public Offering).

## 5. Who Can Invest in the Stock Market?

Anyone can invest—students, working people, or big companies. Some invest for long-term growth, while others trade stocks quickly for profit.

# 6. How is Stock Price Decided?

Stock prices change based on **supply and demand**. If many people want to buy a stock, its price goes up. News, company performance, and the economy also affect prices.

# 7. Risks and Benefits of Investing in Stocks

Stocks can help you grow your money, but there's also a chance of losing money if the market falls. It's important to learn and invest wisely.

# Conclusion

The stock market helps companies grow and allows people to invest and earn money. Understanding how it works helps us make smart financial decisions.

Thank you
